

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

### Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

## PREFACE.

---

A KNOWLEDGE of words is quite as essential to the writing of good English as is a technical knowledge of grammar. As a groundwork for the study of composition, rhetoric, and English literature, there ought to be, for students not pursuing a classical course, some systematized course of word studies for the purpose of giving accuracy and force in writing, and for enabling pupils to appreciate the diction of the masterpieces of style.

The vocabulary of most pupils, when admitted to High Schools or Normal Schools, is quite limited ; and, to judge from the result of teachers' written examinations, comparatively few of the graduates of High or Normal Schools have been trained to discriminate the finer shades of signification in the use of synonymous words, or even to give exact definitions.

This condensed hand-book is designed to meet a want expressed by many teachers who feel the need of some definite study of the words of our mother-tongue.

The only originality claimed for these exercises consists in their *arrangement* and *limitation*.

Some of the leading features of this book are :

1. A *résumé* of the rules of spelling.
2. The defining of words grouped under leading topics.
3. Exercises requiring pupils to collect, group, classify, and define words.
4. Exercises in training students in the habit of referring to the dictionary.
5. The practical treatment of Word Analysis.
6. A practical course of exercises in synonyms.
7. A full recognition of the educational axiom, *that pupils are educated mainly by what they do for themselves and by themselves.*

J. S.

SAN FRANCISCO, *December, 1878.*

## SPELLING AND PRONUNCIATION.

### RULES FOR SPELLING.

#### I. Doubling the Final Consonant.

**RULE I.**—*Monosyllables, and other words accented on the last syllable, ending with a single consonant preceded by a single vowel, double the last letter on taking a suffix beginning with a vowel.*

## 34. Words Often Mispronounced.

Intermediate *a* as in *äsk*. This is a medium sound between Italian *a* and short *a*. Avoid the two extremes: (1) That of Italian *a* as *fäst* for *fä*st, *därnce* for *dä*nçe, etc. (2) That of short *a*, as *däsk* for *äsk*, *dänce* for *dä*nçe, etc.

chäff	gräss	mäss	tränce	räft'er

### 35. Words Often Mispronounced.

The sound of long *u* is a compound sound formed of a slight sound of *y* joined with *oo* long. After *d*, *t*, *l*, *u*, and *s*, it is somewhat difficult to introduce the *y* sound. Avoid the two extremes: (1) That of overdoing the *y* sound so as to make *dū'ty* sound like *jū'ty*. (2) That of sounding *u* like *oo* long, as *doo'ty* for *dū'ty*.

## SECTION VI.

### I. CURRENT WORDS OF FRENCH ORIGIN.

NOTE.—The following words have come into use in English speech through the French and Norman French, though many of them were originally of Latin or Greek derivation, and some few of Teutonic.

Some of these words have become fully Anglicized in pronunciation and accent; others are only partially Anglicized; while some are purely foreign words. As these words are in current use in newspapers and magazines, it is desirable that pupils should know how to pronounce them and spell them. Teachers must give the correct pronunciation. It is also desirable that pupils should be required to define every word, and, as far as practicable, to give the derivation and root-meaning.

## 110. Dictation Exercise.

### *I. Spelling, Capitals, and Punctuation.*

The imperial astronomers of Chaldea went up almost to the stars in their observatories; but it was a Greek who first foretold an eclipse, and measured the year. The nations of the East invented the alphabet; but not a line has reached us of profane literature, in any of their languages—and it is owing to the embalming power of Grecian genius, that the invention itself has been transmitted to the world. The Egyptian architects could erect structures, which, after three thousand five hundred years, are still standing in their uncouth, original majesty; but it was only on the barren soil of Attica, that the beautiful columns of the Parthenon and the Theseum could rest, which are standing also. With the decline of liberty in Greece, began the decline of all her letters, and all her arts, though her tumultuous democracies were succeeded by liberal and accomplished princes.—*Edward Everett.*

## 111. Dictation Exercise.

### *I. Spelling, Punctuation, and Capitals.*

In all its history it has been beneficent. It has trodden down no man's liberty, it has crushed no State. Its daily respiration is liberty and patriotism. Its youthful veins are full of enterprise, courage, and honorable love of glory and renown. Large before, the country has now, by recent events, become vastly larger. This Republic now extends, with a vast breadth, across the whole continent. The two great seas of the world wash the one and the other shore. We realize on a mighty scale the beautiful description of the ornamental edging of the bucklers of Achilles—

“Now the broad shield complete, the artist crowned  
With his last hand, and poured the ocean round,  
In living silver seemed the waves to roll,  
And beat the buckler's verge and bound the whole.”

—*Daniel Webster.*

**112. Dictation Exercise.**

*Treat as in 111 and 112.*

Oh! But he was a tight-fisted hand at the grindstone, Scrooge! a squeezing, wrenching, grasping, scraping, clutching, covetous old sinner! Hard and sharp as flint, from which no steel had ever struck out generous fire; secret, and self-contained, and solitary as an oyster. The cold within him froze his old features, nipped his pointed nose, shriveled his cheek, stiffened his gait; made his eyes red, his thin lips blue; and spoke out shrewdly in his grating voice. A frosty rime was on his head, and on his eyebrows, and his wiry chin. He carried his own low temperature always about with him; he iced his office in the dog-days; and didn't thaw it one degree at Christmas.

**113. Dictation Exercise.**

Two men I honor, and no third. First, the toil-worn craftsman that with earth-made implement laboriously conquers the earth and makes her man's. Venerable to me is the hard hand, crooked, coarse, wherein notwithstanding lies a cunning virtue, indefeasibly royal as of the sceptre of this planet. Venerable too is the rugged face, all weather-tanned, besoiled, with its rude intelligence, for it is the face of a man living manlike. O, but the more venerable for thy rudeness, and even because we must pity as well as love thee, hardly-entreated brother!—*Thomas Carlyle.*

**114. Dictation Exercise.**

Had the Plantagenets, as at one time seemed likely, succeeded in uniting all France under their government, it is probable that England would never have had an independent existence. The noble language of Milton and Burke would have remained a rustic dialect without a literature, a fixed grammar, or a fixed orthography, and would have been contemptuously abandoned to the use of boors. No man of English extraction would have risen to eminence, except by becoming, in speech and habits, a Frenchman.—*Macaulay.*

# SWINTON'S READERS.

An Entirely New Series of School Reading Books,

BY

PROF. WM. SWINTON.

THESE books are preëminently **Language Readers**. They present a most complete development of the study of words and sentences as an essential condition of good understanding and correct reading.

The illustrations are by the most eminent American artists: Church, Dielman, Fredericks, Pyle, Harper, White, and others, and were drawn expressly for these books.

- I. **Swinton's Primer and First Reader.**—In print and script exercises. The script exercises are a specially attractive feature, being white on black, as in blackboard and slate work, the script being the result of careful experiment in securing a practical style of letter for this sort of work. Another noticeable feature of this book is the type, which was made for us, and which is unlike any other font of type heretofore cut, in the matter of size and face. Handsomely illustrated, and bound in cloth. One volume; 120 pages.
- II. **Swinton's Second Reader.**—In print and script exercises. This is also a beautiful book, and commends itself especially for its grading, for the purity and sweetness of its literary form, and for the development of "language work." Illustrated, and bound in cloth. 176 pages.
- III. **Swinton's Third Reader.**—Presenting many new and original features. Noticeable for the charming series of original lessons entitled "Home Pets," "Bright Examples," and "About Plants." Illustrated, and bound in cloth. 240 pages.
- IV. **Swinton's Fourth Reader.**—A book of choice selections for this important grade, carefully edited and arranged. It contains also many useful and entertaining original lessons, especially on "Useful Knowledge" and "Pictures of American History." Illustrated, and bound in cloth. 384 pages.
- V. **Swinton's Fifth Reader and Speaker.**—This book contains abundant exercises in language reading, recitation, and declamation. An instructive and entertaining original feature is the series of lessons under the title of "Glimpses of Science," presented in the highest form of literary art. Illustrated, and bound in cloth. 480 pages.

\*.\* *Sample pages and full descriptive circulars, by mail, to teachers and educationists.*

\*.\* *A set of the Readers, from the First to the Fifth, inclusive, sent to any teacher or educationist on receipt of \$1.75.*
